FOREWORD

Most reported cases include the opinions of several judges; however, in this volume, not all judgments have been reproduced. At the beginning of each case, the source is mentioned in order that you may refer to the original if you wish and read the full report. Underneath, all judges present at the appeal are named; those whose names are underlined wrote opinions and an asterisk indicates inclusion in the casebook.

Finally, although an attempt has been made to divide the casebook into segments, there are inevitable overlaps from one part of the law into another. By making use of the cross-references, you will be able to get a better idea of the full range of material in a particular subject area.
